DETAILED ACTION

1. The examiner and art unit to which the instant application is assigned has changed. Please see information below.
2. Claims 8-11, 14, 16-18 are pending in the instant application
3. This action contains new grounds of rejection.

Claim Objections

4. Claims 8-11, 14, 16-18 are objected to because the claim contains more than one period. For example, SEQ. ID. NO. 1 contains several periods and the end of the claim contains a period. As provided in the MPEP 2422:

(d) Where the description or claims of a patent application discuss a sequence that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the sequence identifier, preceded by "SEQ ID NO:" in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application.

This objection may be overcome by amending SEQ. ID. NO.: 1 to read SEQ ID NO: 1 (see MPEP 608.01(m)).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) Claims 16-18 are drawn to a method for screening for SCA, however, there are numerous SCA diseases. The instant claims appear to be drawn to methods of screening for SCA2. This rejection may be easily overcome by inserting a 2 following spinocerebellar ataxia.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 16-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,251,589. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are obvious over one another. The claims of the patent are to a method for diagnosing SCA2 by using two primers, performing PCR, and measuring the number of CAG repeats. The instant claims are drawn to a method for screening for SCA by contacting a sample with two primers, performing PCR and measuring the number of CAG repeats.

Conclusion

7. Claims 8-11, 14 are allowable over the art.
8. Claims 16-18 are rejected.
